ChiliProject - Feature # 1029: Remove support for the mysql adapter in the Gemfile

Status:	Open	**Priority:**	Normal
Author:	Holger Just	**Category:**	Libraries
Created:	2012-06-05	**Assignee:**	Holger Just
Updated:	2013-08-05	**Due date:**	

Remote issue URL:

Affected version:

Description: For Ruby 1.8, we currently support the @mysql@ and @mysql2@ adapter. This is rather confusing for people and doesn't really help anyone. @mysql2@ is more stable, faster and maintained (which @mysql@ is not). I thus propose to:

* remove the @mysql@ adapter
* retain the @mysql@ group but include the @mysql2@ adapter in it
* deprecate the @mysql2@ group

Maybe, for 4.0 we can completely remove the @mysql2@ group (and the @mysql@ adapter). We then just need to adapt the upgrade guide.

Thoughts?

Works for me, the deprecation of the mysql2 group should be well documented though. Couldn't we just leave it as an alias to the mysql group?

- Assignee set to Holger Just

- Target version set to 4.0.0

After discussion in IRC, we target this for 4.0 where we will completely switch to the @mysql2@ adapter

2013-08-05 06:34 am - Toshi MARUYAMA

- Target version changed from 4.0.0 to 3.9.0

commit:dff8cf66b50fcd2f1 removed mysql adapter.
