ChiliProject - Bug # 1197: Links to new and existing Pages in chili wikis have the same color. Thats boring.

Status:	Closed	**Priority:**	Normal
Author:	Alf Gaida	**Category:**	Wikis
Created:	2013-01-06	**Assignee:**	Felix Schäfer
Updated:	2013-01-06	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	Only a few thougts:

* If one misspell a link to an existing wiki-page this is not visibe in the wiki - boring

* I have no chance to see if a wiki-page exists by looking into a page, that is boring too.

* Sample:

[[Viewing Wiki Pages]] - page exists

[[Viewing Wike Pages]] - page misspelled

[[My cool new wiki-page]] - new page

I would suggest to put somthing like the following somewhere (where it fits) in public/stylesheets/application.css

```
<pre>
a.new {
  color: #ff0000;
}
</pre>
```

- Status changed from Open to Closed

- Assignee set to Felix Schäfer

Implemented in commit:cdad6f7, but italic instead of bright red. We'll have to review the colors for version#23 though.

Thanks for the suggestion!
