ChiliProject - Task # 174: Document config/configuration.yml on the Wiki

Status:	Closed	**Priority:**	Normal
Author:	Eric Davis	**Category:**	Documentation
Created:	2011-02-11	**Assignee:**	Eric Davis
Updated:	2011-02-25	**Due date:**	

Remote issue URL:	
Description:	A recent sync with Redmine brought in a new configuration system for email and other things (config/configuration.yml). The existing documentation needs to be reviewed and updated for this.

[#174] Change Redmine to ChiliProject in the user configuration files

History

2011-02-14 06:24 am - Toshi MARUYAMA

I update source:config/configuration.yml.example .

http://www.redmine.org/projects/redmine/repository/revisions/4821

It is incompatible with commit:d449ac51 .

We will be reviewing the latest Redmine commits after the 1.1.0 release, it will probably be pulled in with that one.

No fixed. Chili is incompatible with Redmine.

Current Chili code does not work "C:\Program Files\TortoiseHg\hg.exe" on Windows.
"/space space/git" does not work on Linux.

2011-02-25 01:03 am - Toshi MARUYAMA

You should cherry-pick http://www.redmine.org/projects/redmine/repository/revisions/4821 .

Toshi MARUYAMA:

I've opened #225 with your suggestions. This issue was only to document the configuration.yml file and not to pull in code into ChiliProject.
