ChiliProject - Feature # 283: Check pre-i18n 0.4.2 depreciation

Status:	Closed	**Priority:**	Normal
Author:	Eric Davis	**Category:**	Translations
Created:	2011-03-14	**Assignee:**	Eric Davis
Updated:	2011-03-21	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	Need to check that pre-i18n syntax files are depreciated (@{{ }}@) so they can be removed in 2.0.0.
	Reference: https://www.chiliproject.org/boards/2/topics/69

[#283] Fix tpyo

History

2011-03-19 08:24 pm - Eric Davis

- Tracker changed from Task to Feature

- Status changed from Open to Closed

Tested the i18n deprecation, changed it to use Rails' deprecation module so it's clearer in the logs, and added a "forum
post":https://www.chiliproject.org/boards/2/topics/243 for the official deprecation.

Merged into master and unstable

2011-03-21 04:39 pm - Gregor Schmidt

Apropos tpyo: I think, you are talking about _deprecations_ and not _depreciations_. The same goes for the forum post.
