ChiliProject - Bug # 653: Multiple query related models defined in one file

Status:	Closed	**Priority:**	Normal
Author:	Gregor Schmidt	**Category:**	Refactoring
Created:	2011-10-12	**Assignee:**	Eric Davis
Updated:	2011-10-15	**Due date:**	

Remote issue URL:	
Affected version:	2.3.0
Description:	When multiple classes are defined within one file, this tends to mess up Rails autoloading in development - especially when plugins try to redefine/patch these models.
	The (to be) attached pull request simply moves the models into separate, properly named files.
	I propose to keep this change for Chili 3.0 since it might change the autoloading some plugins could rely on. It should therefore be safer to wait for a major release.

Fixed: CVS repository doesn't work if port is used in the url (#653).

Added functional tests for CVS adapter.

Ran the tests and merged into unstable. Thanks for fixing that, it was bugging me too.
